

Do you want to conserve energy and reduce utility costs?

Go Green Imaging LLC

Need an unbiased thermal audit?

Go Green Imaging is an **independent thermal auditing service**. Our mission is to provide you with a comprehensive infrared thermographic analysis of your home or business so you can:

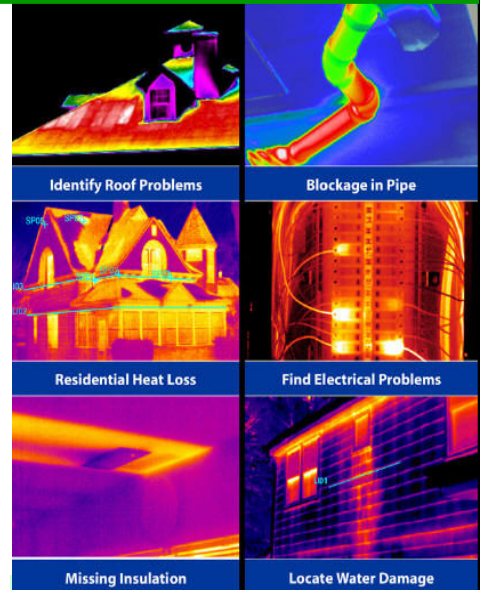

- Locate and address heat losses in a new or existing building
- Locate missing, improperly installed, wet, or damaged insulation in walls, floors, and ceilings
- Troubleshoot problems in heating, cooling, and plumbing systems
- Detect poor electrical connections, overloaded circuits, and other electrical imbalances

At **Go Green Imaging**, we don't sell products or offer repairs. We confine our services to **assessment and documentation** only, so we can provide you with an independent, objective thermal audit. This lets **you** be in control of how you may want to address any problems that we identify.

Who Can Benefit:

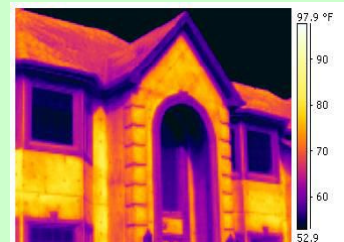

Go Green Imaging thermal audits are ideal for anyone who doesn't currently incorporate infrared cameras or trained thermographers in their business or home repair work. This includes:

- Do-It-Yourselfers
- Realtors
- Home Inspectors
- Contractors

WHY USE THIS SERVICE?

- You want to conserve energy and reduce utility costs
- You need a survey to reveal structural defects before your warranty expires
- You want to make a new structure as efficient as possible

Quickly identify problem areas that can't be seen by the naked eye eliminating destructive probing methods.

Call for an appointment and estimate.
